

Telecommunication Market is being continuously evolving. Today we mostly fight for the improvement of service quality and assurance, instead of increasing subscribers base and area coverage. Each customer is weight in gold and NETBYNET understands that. Being a “Country-Wide Network Service Provider” we meet heavy challenges to our business: how to prevent revenue leaks on providing basic services and products, how to enhance our influence in current Markets and conquer new to increase revenue of business.

To be on the cutting edge in our business, we must continuously extend and support our Product Catalog, speed up and simplify Service Delivery for end-user and as a result - have loyal and satisfied customers, which bring us a profit.

It can't be accomplished without reliable partners.

OS group plays an important role in supporting and developing our operational and business-processes by providing us with their services, solutions and expertise to achieve goals.

Solutions, developed on their platform Equipment Manager brought us to increased networks stability, acceleration and automation of routine processes and RCA, increased speed and quality of restoration and maintenance procedures, cross-integration of business processes.

We reduced our operational and capital expenses, freed-up our precious time resources and became faster and more flexible than competitors. So we can evolve without unnecessary interruptions, develop our business products efficiently and can be assured that our customers always will be satisfied with a quality and a variety of services.

Based on the long-time productive partnership, we would like to recommend OS Group as a strategic partner to increase quality of your operation processes and achieve your business goals.
